

Landis Woods Nature Preschool Newsletter

“Of all the paths you
take in life, make
sure a few of them
are dirt.”

— John Muir

Having Fun

We are having fun! We have learned the letters G, L, H, P, and E, as well as the words gander (male goose), logging, hibernate, and electricity, to name a few. Letters and sight words are just some of the academics we are focusing on. Sight words to practice at home include: for, go, away, in, a, big, I, blue, find, and can.

We have completed various experiments and projects, and even had a special visitor. To learn about G, we planted garlic and made our own grass heads, as well as spent the day with a goat! Other experiments/projects involved pumpkins, electricity, and eggs. As our students grow and mature we have been venturing further out into the park. We like to vote for our play areas, and some favorites are the Pine Tree Area, the Garden (Rocket) Area, and the Crystal Area.

With cooler weather approaching, we are still seeing creatures throughout the park, even having a bald eagle fly over our afternoon class! Our chance encounters with the Sneaky Squirrel continue to excite us, and we enjoy counting the number of acorns he leaves us each day. Our hikes provide many opportunities to put our lessons to use, recognizing letter sounds in geocaching, lantern flies, logs, and pine trees.

In the Future...

In the coming weeks, we will continue our exploration in nature and academics. We will learn letters B, A, and N, as well as about botany and nocturnal animals. We will continue doing many experiments and crafts, as well as a special study to learn what's in Landis Woods at night!
